**Re: NOTICE #1 TO - A PILOT FOR POINT CONDITION MONITORING**  
**(PCM)**

**Question:**

ISR has been requested to specify the type of the point machines which are going to be monitored.

**Answer:**

ISR's point motor are manufactured by "ALCATEL and the specifications are "Point motor Technical data: 3 phases, 220V AC, 750W ".

**Question:**

ISR has been requested to specify the turnout manufacturer.

**Answer:**

ISR's turnout manufacturer is "[Vossloh -Cogifer](#)" model L700H (old one) and model L826H (new one)

**Question:**

ISR has been requested to specify the type of signaling interlocking installed at Lod Station.

**Answer:**

ISR uses in LOD and in the southern part of Israel the ESTW – L-90 – Interlocking system by Thales. In the northern part of Israel, ISR uses the RSTW – SPDRL- 72-2 Interlocking system by Thales.

Yours Faithfully,
